American Sound Isolation Tape™

The American Sound Isolation tape is a closed cell foam tape that is 1/8" thick and 1 7/8" wide. This tape is used on studs and joists to isolate the wood or steel studs or joists from the wallboard. The Isolation tape provides effective sound isolation of the wallboard from the hard stud or joist structure. This isolation breaks the circuit of sound transmission that would normal be transmitted directly through the studs or joists and into the wallboard. This product is an effective way to give your walls and ceilings sound isolation without breaking the bank. The rolls are 100 lineal ft long and are 1 7/8" wide. We also offer 2 1/4" and 3" wide rolls. All rolls are 100' long.

Please call us for assistance in pricing your needed quantities.
