Simply Close the Door

THE SECURY AUTOMATIC DOOR LOCK

European technology in a North American Lock

By simply closing the door the upper and lower $\frac{3}{4}$ " (20 mm) latches will instantly engage

By turning the key from outside or the knob from inside it will engage the 1" central deadbolt and block the top and bottom latches to become a 3-deadbolt locking system

The Advantages

- 20 mm tempered steel latches engage behind the strike-plate and prevent the door from warping
- No lifting of the handle to engage locking points
- 90 degree thumbturn to engage deadbolt function
- The tapered latches always engage the keepers upon closing of the door
- The top and bottom locking points:
 - give more security
 - give better weather sealing performance
 - help reduce door warpage
- High grade 16 mm Stainless Steel faceplate for higher corrosion resistance
- Radius ends on faceplate for a clean look and easy installation
- Available for standard and 8 foot doors, in 45, 50 and 60 mm backsets

* Can be fitted with Ferco handle trim sets
